SECRETS OF THE WEALTHY

Dr. Jessica's Mastermind: Secrets of Wealth

Welcome to Dr. Jessica's "Mastermind: The Secrets of Wealth". This is Dr. Jessica Davis. Thank you for visiting my website, my Mastermind communication portal coming to you live from outside of Princeton, New Jersey. As we all know, we have been asked to shelter in place. So I'm coming to you from my home today. You are here because someone extended an invitation to you and I'm excited about that. This will be a life-changing opportunity for you. So let me jump right into what my Mastermind is all about and give you an opportunity to

jump on board and walk with me. Well, the next 12 sessions, and if you continue to have a great interest by the end of the 12 sessions, I have an Outrageous Opportunity for you.

This will be a life-changing opportunity for you. So let me jump right into what my Mastermind is all about and give you an opportunity to jump on board and walk with me.

And let me just say initially, we are not talking about getting rich quick schemes. This is a journey, a journey to living a wealthy life. And so those of you who will be invited at the end of the Mastermind to become a wealth builder, I'm asking for a two-year commitment. It will take time to begin moving towards greater wealth in your life. So, we are in the midst of a health crisis in the United States and around the world. I was just reading an article identifying the countries that have been impacted by this virus. And at this point, there are only 18 countries left that have not been impacted. So this is a global crisis and because of this global health crisis, it has impacted the economies around the world. It has impacted the economy of the United States.

We are trying to stabilize it and give it an opportunity to survive, to maintain during this outbreak. What's very interesting about it and why I have invited you to join my Mastermind, Dr. Jessica's Mastermind, the secrets of the wealthy is because I have been talking to men and women and I have been listening to men and women about their financial health. And what we don't know is that 76% of our population lives paycheck to paycheck. And as I listened to the news stories and many have been out of work, laid off, and let go from their positions, two weeks have passed, three weeks have passed, and they can't afford to pay their rent. Something's wrong. And so, and talking to my colleagues, I decided that it was time to create this new Mastermind.
