Introduction

Have you ever seen websites that sell eBooks or other products, and wondered how much money they're *really making*?

Have you ever tried to sell a product online and found that it didn't fly off the "digital shelves" the way you hoped it would?

Maybe you've been led to think it's all a big scam or lie. Perhaps you think no one is really making any money online.

You would be wrong!

The truth is that although there is a lot of bad advice out there, and although a lot of JUNK is being sold in a very cynical matter, those that get it are REALLY thriving.

The web makes it possible to connect with a gigantic audience of billions of people and to provide them with all kinds of products in an entirely automated matter. If you can create or find a great product and then share it with the right people, you can generate a MASSIVE PROFIT while you sleep.

It's that simple.

There are people out there who are GENUINELY making hundreds of thousands of dollars every month from this kind of strategy.
