Introduction

From time to time, we are experiencing distinct revolutionary changes and innovations from different fields. With the use and the engagement of information and communication technology, we are continuously introducing many convenient ways of living and learning. One area which has been influenced by the innovation brought to us by ICT is the learning discipline. It has brought a significant impact on both learners and educators.

There is a massive advantage of using technology to support both teaching and learning. Through this, technology introduces classrooms with digital learning tools, such as computers and portable devices. It develops course offerings, experiences, understanding, as well as learning materials. We can also seek for 24/7 learning support. Moreover, technology helps in building and strengthening the 21st-century skills and aids in increasing student engagement and motivation, accelerating their learning. This idea links educators to learners with professional content, resources, and systems to help them improve and develop their instruction and personalized learning.
