INTRODUCTION

Despite the restrictions that many organizations have faced during the global epidemic and lockdown, the art and science of sales has never been easier.

More companies and consumers are buying online, globally. This gives any salesperson the chance to extend their market reach, with just a laptop from anywhere on the planet. Sales, often derided by 'intelligent professionals' is actually THE most important part of any organization. Zero sales; everything else is dust in the annual statements. Not everyone likes sales but I will argue that it is a skilled job that is essential to learn if you are going to progress. If you have your own business, it is a 'must have'.

I will show you how to do it, after my 33 years of experience.

There are personal development attributes that you need. If you manage to change your mindset, the opportunities are unlimited.
