Most Amazing Sight

you ever saw!

WORLDS DESTROYED

BEFORE YOUR EYES—

as you look through the
RADIUMSCOPE!

IF YOU want to see a most awe-inspiring sight, view the actual destruction of thousands of worlds by simply looking through the lens of the new RADIUMSCOPE. See RADIUM DISINTEGRATED AND DESTROYED RIGHT BEFORE YOUR EYES. Witness a real atomic bombardment — a never-to-be-forgotten sight! You plainly see radium rays and the discharge and bombardment of the Alpha particles. There is no more remarkable and awe-inspiring spectacle in the whole world than what you can see in this marvelous RADIUMSCOPE.

The RADIUMSCOPE is without a doubt one of the most amazing scientific wonders ever invented. For ages scientists thought that atoms were indestructible. Yet the RADIUMSCOPE shows plainly that radium actually destroys atoms, (atoms are miniature worlds). Look into the RADIUMSCOPE and behold the most astonishing sight. You see a brilliant "night sky", alive with thousands of "stars" and myriads of bright flashes similar to showers of shooting stars. *Every flash is the result of the destruction of one atom of radium.* As each radium atom is destroyed, it creates a Helium gas atom which it shoots out like a bullet at the terrific speed of

10,000 miles a second. These fast-traveling Helium atoms (also called Alpha rays) make a vivid flash of light when they strike a zinc sulphite crystal, inside the RADIUMSCOPE. A strong magnifying lens makes these flashes visible and you actually see the never-ending motion of the tiniest particles of matter known to science. The bombardment keeps on going not only for a few days, but for over 1,800 years, never stopping. Thus, the Radium in the RADIUMSCOPE, if preserved, will outlive you and many succeeding generations.

This is how the RADIUMSCOPE looks. Metal, nickel-plated telescope case. Handy and easy to focus to any eyesight. Carry it in your pocket.

Our RADIUMSCOPE actually contains a small quantity of real radium.

There is nothing to replace, nothing extra to buy. The instrument will last indefinitely. It can be adjusted to anyone's eyesight by means of a clever telescopic adjustment.

The RADIUMSCOPE is also a wonderful light-guide. IT GLOWS WITH A WEIRD LIGHT IN A DARK ROOM.

Place it on the night table or anywhere else in your room; then when you get up at night you won't bump into furniture in the room.

This only gives a faint idea what you see. A picture can't show motion nor the real bombardment that you see inside the RADIUMSCOPE. It's a marvelous sight!
