ACKNOWLEDGMENTS

I would like to thank my book consultant, Joan Rhine, for her expertise in all areas of book publishing.

Thanks to all my writing club friends, the Tulsa NightWriters, for their encouragement.

And, especially, thanks to my family for all their support.

Introduction

Does your family have an emergency plan to ride out the aftermath of a disaster? Can you imagine anything more frightening than not being able to communicate with loved ones, to know that they are all right and to report you are as well?

The Red Cross and FEMA websites have online checklists to follow in the event of an emergency, but they leave out critical information. They tell you to have an emergency radio with AM, FM and Weather capabilities but don't explain how to find the stations that are provided with emergency information. They don't explain why cell phones may not operate during a disaster. They don't tell you how you can stay in touch with family and friends by radio.

In the Event of an Emergency

This book explains how to actually use those emergency radios in plain language, and in a step-by-step format.

- In plain language you will learn about different radios that are available to you and how to use. With a little training, on your own and with this book, you can use two-way radios to communicate with your loved ones, regardless of whether phone and cell towers are functioning. In addition, you can use these same radios to stay abreast of changing conditions and changing emergency situations.
- Should you need to talk farther than about 25 miles, amateur (ham) radio is an option that is easier to obtain than in any time in history. This book explains how to listen to hams in your area or world-wide. If you decide you want to get a license to transmit, Chapter 5 is an introduction to ham radio with steps for passing the entry-
