INTRODUCTION

Ask a person about the basic things he needs, and his answer would be these three: food, clothes, and shelter.

As the world's population continuously grows by around 83 million annually, the demand for shelter, especially for real estate properties, is constantly increasing through the years. Some are moving to larger spaces for their families. Some are looking for a lodge to relax. Some want their money to be spent on something worthwhile. Some are finding possible investments that can grow their value over time.

Consequently, this creates a situation which is called by economists the "real estate boom." As more and more people are finding a house, apartment, or condominium to buy, real estate businesses are constantly booming.

Now, what is there when there's also a demand? Opportunities. An opportunity to satisfy the needs of the people. A chance to establish a money-making business.

An opportunity to earn money and amass riches. This opportunity must be seized. One way used by experts in this field to seize these opportunities is by availing real estate properties for a low price and hoping they can get monetary gains. This can be made through renting, flipping, or reselling. However, this requires enormous financial capital, with expenses spanning from the down payments to completing the purchase to the maintenance of the property.

However, what if I tell you that you can start a real estate business deal without bringing even a single cent out of your pockets? This might seem impossible and too good to be true, but the wiser people of this field had mastered this art of "free real estate." Several starters use these methods to start the business from scratch without giving too many initial expenditures. On the other hand, veterans in this field use these strategies to earn money even more through simultaneous investments.

WHATEVER YOUR REASON MAY BE, THIS BOOK IS PERFECT FOR YOU!

This book explains the possible ways to raise funds from others for purchasing real estate properties without the risk of bringing out any personal money (or just a little bit). This also lists the advantages and disadvantages of each method to help you decide the best way to start your real estate business! Note that while every method has its pros and cons, decisions should not be based on which has the most benefits and the fewest drawbacks. Some might have disadvantages that have little effect compared to their advantage or the other way around.

SO, START READING, START INVESTING, AND START EARNING!
