PASSIVE INCOME WITH CRYPTO YIELD FARMS

So this will work for you. If you get the information you need. Who is this for now? I want to be clear about this because this is really for two groups of people. First, let's say you've invested in cryptocurrencies before. This is fantastic for you, but also even if you don't know anything about cryptocurrencies, blockchain, Bitcoin, this is all brand new to you. This is awesome for you to discover what and how Bitcoin, blockchains and cryptocurrencies work.

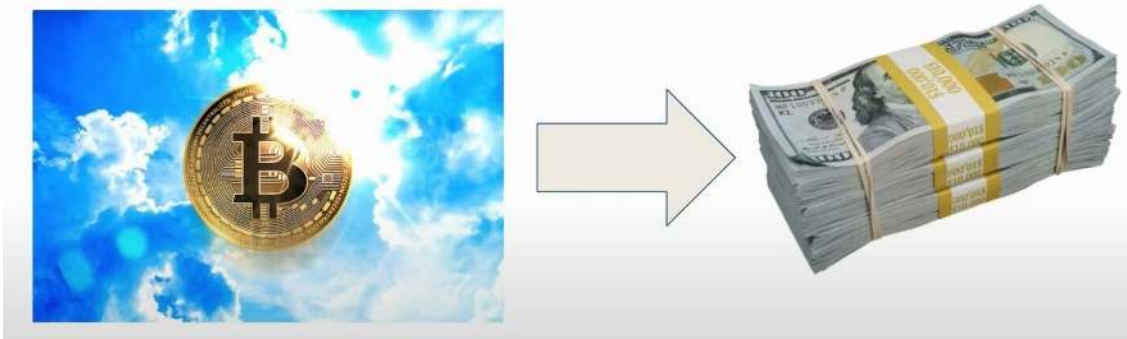

So what is Yield Farming? To me it is a collection of techniques using cryptocurrencies to be able to earn passive income. Now, to be clear, I'm not talking about making money by buying cryptocurrency and hoping it goes up in value. That's not what we're doing here. I'm talking about using these techniques to earn cryptocurrencies. You did not have to buy like Bitcoin mining or anything like that. This is completely different from Bitcoin. We are earning income, in an entirely different way. We're earning interest on our money here. My goal for this time is that you have two takeaways. First. I hope that at the end of this, you realize that yield farming is by far the most effective way to be able to earn passive income. And secondly, that the only real way to get started with yield farming is with a solid financial training in the area of Yield Farming.

PASSIVE INCOME WITH CRYPTO YIELD FARMS

The fact of the matter is I started yield farming because I got tired of working 9 to 5 with no real end in sight and financial or time freedom . I'm a dad in my 50's , and frankly, I want to live my life not live the life for others like I have all my life! My dreams always have been to build a successful business to support, my wife and kids and make a difference with what I enjoy doing, teaching and inspiring others' to be their best self. I did not want to give up on that dream. I've done the reliable worker gig, various business attempts, and nothing has ever really worked for me that I was happy and satisfied with.

Throughout this entire journey I have studied at uni, worked and felt compromised. At 55 I wanted to live my life and have stability, a consistent cashflow, relaxed and not stressed out financially or feeling like I was in an never ending work and spend cycle. What's more I wanted my children to see something different that showed I was a freeman not an educated enslaved worker. I trained as a teachers and saw that the pathway they were going down was going to be the same for them if I did not show a new way and pathways they could follow if they chose. So I started really looking at what was possible.

I Could Make Passive Income From Bitcoin I Owned!

PASSIVE INCOME WITH CRYPTO YIELD FARMS

So I started to do some investigating and I found a yield farm that was paying over 500% returns. I thought, okay, this obviously has to be too, too good to be true, and almost half as a joke. I put some money came back 24 hours later, and I saw that I had earned a 50 dollars. I was making money. There was no question about it. The money was there, it was printing money. The problem was I was too reliant on the most risky farms. You see, I needed a system which is going to work regardless of market conditions going up or down. I needed a system that was going to give me that stability for consistent cashflow that frankly, my life and wife was demanding.

So if this was going to be my primary source of income, I was going to need a system that allowed me to reduce my risk and consistently grow my cash flows, my primary source of income. I needed a system that allowed me to reduce my risk while consistently growing my cash flows. So what did that mean? What'd that break down to four parts. First. I had to find a way to consistently source these yield farming opportunities. Next, I need to develop a process by which I evaluate the risk and reward of every single yield farm. Third, make sure that the system had the right mechanism so that I could track and monitor all my yield farming positions.

Lastly, each of these yield farms had to fit into an overall diversified portfolio of yield farms to allow me to spread my risk out and consistently produce income. That folks, is what has been developed. This system will give you the time to spend it with loved ones, friends, family, doing vacations, doing the types of things that actually really truly, you know, like enrich your life and community.

So, we are here to talk about the easy way for you to be able to replicate this and do this for yourself. So I want to show you the easy path to actually do this.
