Introduction

Intro

Making your first \$100 online is easy.

Actually that's not quite true—actually earning your first \$100 online IS pretty easy...and what I'm going to show you in this book makes it easier;

What's hard is believing you can do it, and sticking with the method.

Once you've made \$100 then replicating the system is easy. You know

you can do it, your sub-conscious belief system kicks into place and before you know it, pulling in \$100 daily will be a pretty simple matter.

It's that first step that takes some doing.

So much so that I think it's easier to make \$1000, \$10,000 or \$100,000 online than it is to make \$100.

Take that first step, jump that first hurdle and you'll never look back.

The best, simplest and easiest way to start is selling other people's products as an affiliate. There's very little risk, the setting up is quite straight forward with a little help (that's what this book is for) and the results usually speak for themselves.

So let's start with the first \$100.....

Getting Started As An Affiliate

One of the easiest ways to get started in internet marketing is to promote affiliate products. This means you get a commission for each sale of a particular product that comes from your link or referral.

It's definitely the easiest route to making money online.

You don't have to spend time and effort creating and marketing a product of your own, you don't have to deal with customer service and recruiting people to sell for you...all that you have to do is find a product to promote and create a website or link "pre-selling" the product.

Many affiliates choose Clickbank.com to start out with, for a number of reasons.
