Conclusion

Chapter 01 - Introduction

To this day, it amazes me that more people aren't aware of the HUGE potential that the internet represents when it comes to earning money.

This is not just an option for those lucky, tech-savvy entrepreneurs; this is something that *anyone* can

start doing with amazing effects. If you know how to use a computer, then you could be earning money online.

Not only that, but you could be earning *passive income*. That means you could be earning money *while you sleep*. And those passive income business models don't need to be complicated to set up by the way. This is something you can start doing in days if not hours.

Some online business models are so shockingly simple that they literally involve doing little more than 'copying and pasting' an exciting business model to start making it work for you.

And it's not just money that you can stand to gain by doing all this. Running a business online gives you a way to make money doing something you love and that you're truly passionate about. More than that, it will allow you to develop a small amount of fame.

Can you imagine how rewarding it would be to get emails from strangers telling you that your videos or your blog posts changed their lives?

This can be a stepping stone to great things. It can be a way to find yourself on TV some day. It can lead to a publishing contract.
