## Introduction

In contemporary America, a prevailing sentiment exists that something is wrong, yet articulating this sense of unease proves elusive for many. A striking seventy-nine percent of Americans believe we are headed in the wrong direction, yet most have no idea what we are up against and see today's issues and arguments as random ideas and events. Just random bombs in this thing we call life.

Hence, if these events are not mere happenstance, the implication is that they are orchestrated. Such a notion might strike most, particularly Americans, as inconceivable. After all, we proudly identify as the United States of America, a nation built on principles of freedom and courage. But what if one could discern this orchestration? Would that realization be sufficient to persuade belief? If one were made aware that the very freedoms we hold dear are under siege, would they summon the courage to confront this challenge head-on? As you will discover throughout this handbook, a meticulously coordinated effort is indeed underway. It boasts substantial organization and funding, all converging around the pivotal year of 2030.

Before you read any further, there is an exercise that anyone interested in learning about the subject matter presented in this manual should do. **Your assignment:** type in your web browser any city name in the United States, followed by the year 2030. For example, type in your web browser Detroit 2030, Philadelphia 2030, Kansas City 2030, etc. Why is this important? You will quickly see that EVERY major city (and most smaller cities) in the United States has a 2030 plan. This exercise is to establish in your mind that 2030 and its corresponding agenda is not fictional. It's not conspiracy theory. It's real and it's here. But what is the big deal about the year 2030?

The goal of this manual is to expose Agenda 2030 in an elementary way so **YOU** can start doing your own research and develop an educated, informed understanding of what is happening in our world today. It's time to connect the dots - it's time to talk about real issues- issues relative to our lives and the survival of our freedom and democratic process and, quite frankly, the world as we know it. The content presented will hopefully help you to be uninfluenced by the title Democrat or Republican and become an educated, well-informed citizen. Black or white, rich or poor, these issues affect us all and if we are going to defeat it we **HAVE** to put our differences aside and unite under this one common cause.

## How to use this manual

This manual is by no means exhaustive in terms of subject content. This is only the basics, giving you a solid foundation so you can start your own research. Also, as you read this manual, please do not just blindly believe everything in it. **DO YOUR HOMEWORK!** Quite honestly, our blind belief in information is what got us here in the first place. We have become uninvolved and too comfortable, which is going to cost a hefty price if we don't reengage. So, as you learn, ask questions about everything, criticize everything, and heavily vet everything. This is a deceptive game we are in, and we are not up against a haphazard plan. But, with a brave, united, and well-educated citizenry, we can turn this ship around! Understanding this agenda and fighting it with everything we have is the most important thing we can do for our children and our children's children! You're silence equals consent!

As stated earlier, this manual is just touching on the broad subjects. We are encouraging you to learn the basics first and once you have a solid foundation, then you can get into the weeds. You will notice we have left you links to articles and resources for you to check out. All links and resources will be in bold and italicized. If you have the physical copy of this book, just type in the title of the link into your web browser and the article or video will come up.

We also kept this manual very basic and easy to read. We don't use fancy words or complicated language. It is our belief that **EVERYBODY** needs to understand this agenda, so it was created to be an easy read. Our prayer is that this serves as a resource to both young and old.
