## Finally! Get The Tools, Training and Support You Need To Successfully Start Your Own Online Business

Starting a successful online business isn't nearly as easy as they make it seem, is it? If you've tried and failed before, it's not your fault and you're not alone. In fact, most people fail because they're lacking one of these three core components:

- The Proper Tools
- The Correct Training
- The Necessary Support

If you're lacking in just one of these areas, all the hard work in the world won't get you there. What makes me qualified to speak so confidently about online success? Well, I have succeeded... AND I have failed!

Hey there, my name is Vickie Helm and if you're still trying to put it all together, I know exactly how you're feeling. Don't be fooled by my success. Sure, I'm an entrepreneur who built 12 successful businesses. And yes, I now have 20 years as a business and digital assets strategist. I also happen to be an international speaker and the bestselling author of 24 books.

I share this with you because I need you to know that you can trust me, however... I don't want you to get the wrong idea. Today, I'm a successful online entrepreneur, but I'll be honest... Things definitely didn't start out this way, and there were times when...

I wasn't sure I was going to make it... If you know my story, then you know how much I struggled in the beginning and how many times I was tempted to just give up.

In fact, I swore that if I ever made it, I would make sure that nobody else in my shoes would ever have to struggle like I did again.

I promised myself that I would create an affordable solution that took people by the hand and led them step-by-step through each and every challenge I struggled with...  
And you know what?

**I kept that promise...**
