

A glowing lightbulb with a warm, orange and red glow. Inside the bulb, a miniature landscape is visible, featuring a central topiary tree with several rounded, green foliage sections. The background within the bulb shows a bright sun setting or rising, with a sky filled with numerous small black birds in flight. The lightbulb is mounted on a dark, textured, cylindrical base.

Welcome to the Group

Our Mission

We are a group of like-minded individuals whose purpose is to empower and enable people to create the life they love without causing harm to themselves or the planet. I'm so glad you have joined us on this journey. For far too long, people have believed that the only way we can create wellbeing is by extracting from the earth and selling it to others. Climate change, ecosystem degradation, soil degradation and biodiversity loss are symptoms of an economic system that are destroying our planet and the living beings on it. People are suffering from unexplained illnesses and cancer rates are rising because we continue to pollute our world and bodies daily. But there is a better way.

In this group, we share with you the latest eco-friendly news, as well as news that will help you create better health, wealth and relationships simply by showing you how to improve your quality of life. You will receive tips and tools that will help you live clean, create more health and improve the all-around wellbeing of your family. We invite you to join us on this informative and fun journey to help you achieve a healthier life, make new friends and save the planet, too. I'm so excited you are here. Please introduce yourself to the group and have a look around...
