Disclaimer: The terms "Light and Sound," while defining, describing, or explicitly referring to the Divine Spirit, Holy Spirit, Pure Spirit, Essence, or Voice of God, are also known by many other names. They are also used when referring to specialized manifestations or aspects of a Supreme Creator. However, such references do not represent, define, speak on behalf of, or share the official views or opinions of any other person, spiritual leader, master, or religious institution.

This short ebook is published online for global distribution and sale. Its content aims to provide essential spiritual insights about the foundation upon which creativity and the creative processes are built. Some of the **universal spiritual laws, principles, processes, etc.,** involved in creativity are identified. Using universal spiritual laws, principles, processes, etc., comes with responsibility, accountability, and liabilities. Hence, the consequences of human use of creativity are governed by universal spiritual laws such as the Law of Cause and Effect, the Law of Retribution, or the Law of Compensation. Many myths about the creative process, the human mind, and the Soul are debunked. Examples of what and how, when and why, and the who and where are outlined for enhanced reader understanding. Examples and benefits of applying creativity in daily life or liberating the Soul from the human consciousness are provided. Human creativity versus Artificial Intelligence (AI) is placed in their proper context.

THE SOURCE OF CREATIVITY

Creativity is God's manifestations of divine intelligence, creative forces, attributes, power, love, and expressions in **constant motion and evolution**. Its secrets, power, mystery, and origin reside in the 'Word' of the Divine Spirit.

The Divine Spirit (Light and Sound) originates in the highest heavens. From there, the Word descends and takes on **manifestations**, using *all the features* of God to express Itself **creatively** throughout creation. As the superior aspect of the Divine Spirit, the 'Word' is described as the **sacred sound of HU**, vibrating at different frequencies within the Light and Sound.

Divine laws, creative principles, processes, and systems act as the **operational framework** within the divine Light and Sound. The **Law of Causation** is a primary creative principle. It uses *divine intelligence* to propel *creative motion and evolution*, pervading all spaces and animating all things. The Law of Causation resides within the Divine Spirit, not individuals.

Human Beings' divine makeup includes the Soul's Light Body, **which connects us directly** to the pure Divine Spirit and the sacred **HU**. Humans consciously or unconsciously **access and activate** divine laws, creative principles, processes, and systems whenever they engage in **creative action** for manifestation or self-expression. Human Beings can learn how to use the Divine Spirit's **operational framework** **consciously**.

Direct contact with divine Light, Sound, or the HU increases our creative capability, capacity, power, and love. **Creativity** empowers and allows Human Beings to manifest God-like attributes, qualities, and capabilities daily in **creative self-expression or manifestations** as the soul's birthright! **All the above-repeated means that God is - The Source Of Creativity!**

SOUL VERSUS MIND

The Supreme Creator bestowed **the divine gift of creativity** to all souls. Thus, **the Soul** is the **main** instrument of **creativity**. Within humans, the **Soul's Light Body** or **consciousness** is **the primary vessel of creativity**.

The way the **creative forces** and their associated powers become **activated** in Human Beings involves visualization, imagination, thoughts, and feelings. The **mechanism** for operating creative processes is focusing and using our **inner attention** within *the mind's eye*, the **location** of the Soul's Light Body.

Hence, our creative, imaginative, visualization, thoughts, and feelings processes occur **subjectively and automatically** within humans. These processes are facilitated by the **Soul's Light Body and the human mind**.

But most humans **do not know or understand** the **difference** between the Soul, the human mind and its mental faculties, or their respective functions.

Therefore, they confuse, assign, or attribute **the creative functions of the Soul** to the mind's intellectual, logical, or analytical thinking processes.

The human mind serves as a **subordinate** of the Soul.

The Soul is creative, eternal, and lives forever. The *human mind* is only a **temporary faculty** that becomes extinct when no longer needed **after our physical body dies**.

Once the Soul occupies a physical body, **it needs a human mind** to facilitate the functional mental processes for temporary human **existence and survival**.

During the Soul's existence in the human body, **the mind acts as Its intermediary** to link subconscious and conscious realities or **translate** subjectivity to objectivity.

The **conscious mind** works with our five basic senses of sight, hearing, smell, taste, and touch **to process** all human *physical* sensations and perceptive and cognitive awarenesses, using intellect, discrimination, analysis, logic, reasoning, thoughts, etc.

Once provided with information, **the conscious mind** can analyze, compare, choose, judge, decide, alter, reinterpret, restructure, like, dislike, etc., **but it is not creative**. The Soul does the creative work.
